

GOTHICSTONE

SEAHAZE Architectural Limestone Collection

Specification & Design Guide

The SEAHAZE Limestone Collection combines refined contemporary aesthetics with architectural-grade limestone performance. Ideal for luxury residential, hospitality, and commercial applications, SEAHAZE SEA™ and SEAHAZE SAND™ provide cohesive material continuity across paving, coping, wall veneer, caps, treads, and outdoor and indoor living environments.

GOTHICSTONE SEAHAZE Limestone Collection isn't just a paver — it's a complete architectural system designed for seamless indoor-outdoor integration and elevated modern design.

One Material. One Vision. Complete Architectural Continuity.

Key Performance Benefits

- Freeze-thaw compatible for all climates
- Cooler underfoot compared to many concrete and sandstone surfaces
- Soft pastel aesthetic
- Dense limestone composition for long-term durability
- Coordinated material palette across multiple applications
- Ideal for barefoot pool environments and luxury outdoor living
- A multitude of different surface finishes for non-slip performance and aesthetic

SEAHAZE SEA™ Limestone

SEAHAZE SEA™ Limestone features cool contemporary gray tones with subtle natural movement ideal for modern architecture, minimalist landscapes, luxury pool environments, and indoor-outdoor integration.

- Cool neutral gray limestone aesthetic
- Available in pavers, coping, wall veneer, caps, treads, and countertops
- Contemporary modular sizing options
- Suitable for pool decks and wet-area applications
- Pairs naturally with steel, glass, wood, and modern architectural palettes

SEAHAZE SAND™ Limestone

SEAHAZE SAND™ Limestone delivers a soft warm-beige palette with refined natural character. Its understated elegance creates seamless transitions between architecture, hardscape, and outdoor living spaces.

- Warm neutral beige limestone tones
- Ideal for luxury pools, terraces, courtyards, interiors, hospitality design, etc.
- Available in multiple finishes and textures
- Many finish options for non-slip performance and aesthetics
- Consistent color and finish coordination across applications

General Architectural Specifications

Category	Details
Material Type	Natural Limestone
Applications	Pavers, coping, veneer, caps, treads, countertops
Design Style	Contemporary, coastal, modern, Mediterranean
Surface Finishes	Honed, leathered, bush hammer, custom finishes
Surface Temperature	Cooler Than Many Concrete & Sandstone Surfaces
Climate Compatibility	Freeze-Thaw Resistant
Slip Resistance	Anti-slip under wet and dry conditions
Color Consistency	Architectural-grade coordinated production
Installation Areas	Pool deck, patio, driveway, walls, architectural accents
Installation	Wet-set or dry-set
